used, variable value can be changed by program or operation in MDI panel ...

FANUC macro program programming - Swansoft

I'm sure I am simply missing a few basic procedures but, honestly, after searching the web and reading both the Fanuc and Okuma manuals I am more confused. In following some of the basic procedures I am able to power up the machine and home it to the initial start position via G28 U0.0 W0.0 when the dial is set to MDI mode.

Fanuc 6T Basic Setup Process - Practical Machinist

With custom macro B, a parameter must be set to make the control activate a specific program (O9001 in our case) whenever an M60 is activated. You must reference the custom macro descriptions in the programming manual for your specific control to confirm the parameter number. For a 16M Fanuc control, for example, it is parameter number 6071.

The Makino commitment starts with global leadership in metal-cutting and manufacturing technology, with industry-leading horizontal machining centers, vertical machining centers, wire EDM and Ram EDM, and graphite machining centers.

Makino | CNC Machine Tool Manufacturer & Machining Centers

Without Macro Programming, G-Code is not really a full fledged computer language, it's more a recording of a series of manual steps. That's useful, but computers and CNC controllers are capable of a lot more. A word about Fanuc Macro B. Fanuc Macro B is by far the most common Macro Programming Dialect.

Sounds like you need to re construct the 9000 series subroutine. Or just program it long hand at every tool change. I can get you the code we use if you like. But yes, you will need to switch out of auto for every tool change (manual tool change machine), then back to auto after manual changing tools, and press start.
