It seems the author's

Read Free Solution Manual For Differential Equations

goal in creating this solutions manual was to show as few intermediate steps as possible. You'd think that most people would take the opposite approach when writing a solutions manual for a differential equations textbook. What a waste. And here I was, hoping for a little help studying for my exam in 3 days.

Differential Equations and Boundary Value P 5th Edition ...

The general solution of the differential equation is This is $y = C_1 e^{ax} + C_2 e^{-ax}$ exactly the form given by Eq. in the text.

Invoking an initial condition, $y(0) = a$ $y'(0) = b$ ($C_1 + C_2 = a$, $C_1 - C_2 = b$) the solution may also be expressed as $y = \frac{a+b}{2} e^{ax} + \frac{a-b}{2} e^{-ax}$.
